

JIBIN K JOHN

Full-Stack Software Engineer - Flutter • React • Node.js
Limerick, Ireland | +353 894026818 | Jibinkunnumpurath@gmail.com | Stamp 1G
[linkedin.com/in/jibin-k-john-35a468270](https://www.linkedin.com/in/jibin-k-john-35a468270) | github.com/jibinkj-07

Professional Summary

Full-stack engineer with 3+ years of experience building production-grade SaaS, mobile, and real-time applications using React, Next.js, Node.js, TypeScript, and Flutter. Experienced in developing scalable APIs, cloud-deployed applications, WebSocket/MQTT systems, and OpenAI API implementations. Built and shipped multiple client and personal products from architecture to deployment. Currently based in Ireland with full work authorization (Stamp 1G), no sponsorship needed.

Technical Skills

Languages	JavaScript, TypeScript, Dart, Python
Frameworks	Next.js, React.js, Node.js, Express.js, Flutter
Databases & Cloud	Mongo DB, Firebase, GCP, Redis, Hive
Tools & Protocols	Git/GitHub, Postman, Jira, MQTT, Web Sockets
Practices	Agile/Scrum, API Integration, performance optimization, product support

Professional Experience

Freelance Full-Stack Engineer | Self-Employed May 2024 - Present
Remote, Ireland

- Delivered 6+ production-ready web and mobile applications across workforce management, finance, productivity, and retail sectors using React, Next.js, Node.js, Flutter, and MongoDB.
- Reduced API response times by 30% on a Node.js backend by implementing Redis caching, achieving 99.9% uptime under sustained load.
- Built real-time communication systems using Web Sockets and MQTT for live updates and device communication.
- Managed end-to-end software delivery including system architecture, deployment, debugging, and production support.

Flutter Developer | Onwords Smart Solutions Jan 2023 – Apr 2024
On-site, India

- Engineered a smart home automation mobile app using Flutter and MQTT protocol, enabling real-time control of IoT devices with sub-second latency.
- Implemented OpenAI API integrations to provide intelligent, personalized features for users.
- Optimized app performance by implementing Bloc state management and local data caching with Hive, reducing screen load times by 35%.
- Collaborated with backend and product teams to deliver scalable mobile features and production releases.

IT Analyst | Wipro

Sep 2020 – Jan 2023

On-site, India

- Provided technical troubleshooting and operational support for enterprise systems and internal users.
- Documented incidents, root causes, and resolutions to improve internal knowledge base quality.
- Communicated technical updates and outage resolutions clearly to stakeholders and support teams.

Customer Assistant | Tesco

Sep 2024 – Present

On-site, Ireland

- Part-time role alongside ongoing software engineering work and SaaS product development.
- Developed strong communication and problem-solving skills in a fast-paced environment, consistently managing high-pressure situations and time-sensitive tasks.

Selected Projects

Workloom – Workforce Management SaaS

workloomapp.com

Next.js • Node.js • MongoDB • WebSockets • Redis

- Developed a SaaS platform for employee scheduling, shift tracking, workforce collaboration, and notifications.
- Developed scalable backend APIs and real-time systems for live workforce updates.
- Designed responsive dashboards and analytics-focused workflows for operational management.

SpendWise – Finance Tracking Application

[Play Store](#), [WebApp](#)

Flutter • Firebase • Hive

- Developed a cross-platform personal finance tracking application with real-time multi-user collaboration.
- Implemented Firebase-backed cloud synchronization and analytics dashboards.

Cinegrid – Movie Discovery Platform

[Website](#)

React.js • Public API

- Built a responsive movie discovery web application using React.js and third-party movie APIs.
- Implemented search, filtering, responsive layouts, and optimized API consumption patterns.

Education

Bachelor of Science in Computer Science | 2017-2020

University of Calicut, India
